

ABDULLAH YAHYA MOQBEL AL-SABAHI

abdullahalsbahi2002@gmail.com | LinkedIn | samofis.com

SUMMARY

AI Engineer with a B.Sc. in Informatics (AI/ML) and an M.Sc. in Computer Science in progress at Universitas Indonesia. Over a year of production experience building and deploying speech (ASR/TTS), NLP, and retrieval-augmented systems for Indonesian, Italian, and Arabic-language use cases, including team leadership on Neuram's Leonardo and Michelangelo platforms. Two publications, including an IEEE 2025 paper on parameter-efficient fine-tuning for code-mixed text. I ship models as APIs with benchmarks, model cards, and handover docs, and I am looking to build applied AI products at Cekat.AI.

WORK EXPERIENCE

Neuram AI | AI Engineer & Team Lead

May 2025 – September 2026

- Led the team building Neuram's Leonardo and Michelangelo platforms and built most of their platform components end to end.
- Build and fine-tune NLP and TTS models for Italian and Indonesian.
- Deploy models as cloud APIs and produce model cards, benchmarks, and handover docs, aligning scope, metrics, and timelines with product leads.
- Develop and optimize STT/ASR pipelines on Whisper-large for customer-service workflows, improving word error rate (WER) and latency.

Wasel Company | AI Engineer

Jan 2026 – Mar 2026

- Built a legal chat assistant for Saudi law that gives grounded Q&A across laws, articles, and legal documents.
- Developed and tuned retrieval pipelines using an LLM provider and pgvector, improving latency, accuracy, and user-facing performance metrics.

BSI-UII | BSI Internship

Feb 2025 – Sep 2025

- Developed an automated FAQ website using NLP to answer frequent inquiries arriving as WhatsApp tickets.
- Built a pipeline that sends printer status updates from Google Sheets to a Grafana dashboard.

Universitas Islam Indonesia | Research Internship

Nov 2024 – Jan 2025

- Researched language identification in code-mixed text; translated datasets and retrained transformer models to measure the effect of data quality.
- Analyzed results to improve multilingual NLP systems.

Indonesian Youth Foundation (IYF) | Ambassador

Aug 2024 – 2024

- Ran a digital marketing campaign targeting young adults in Asia, producing a 15% increase in program participation.

EDUCATION

Universitas Indonesia (Fasilkom UI), Depok, Indonesia

Aug 2026 – Expected 2028

Master of Computer Science (Magister Ilmu Komputer), AI & Data Science track

Universitas Islam Indonesia, Yogyakarta, Indonesia

June 2025

Bachelor of Informatics (AI/ML specialization) | GPA 3.65/4.00

- Coursework: Fundamentals of Data Science, Natural Language Processing, Big Data, Advanced Mathematics, Algorithms and Data Structures, Internet of Things, Medical Informatics Application Development, Extended Reality.

PROJECTS

Leonardo – Neuram AI | Team Lead | neuram.ai/leonardo

2025 – 2026

- AI recruitment platform for candidate search and CV navigation, including candidate fit scoring against job requirements.

Michelangelo – Neuram AI | Team Lead | neuram.ai/michelangelo

2025 – 2026

- Enterprise AI agent for regulated sectors that automates the full compliance cycle, aligns contracts with operations, prepares audits, and builds tender proposals.

Samofis – Virtual Office SaaS | Developer & Product Owner | samofis.com

2026

- Built a live virtual-office platform for the Indonesian market: client portal, partner dashboard, and admin dashboard (Next.js, TypeScript, Tailwind, Supabase with row-level security).
- Integrated Xendit payments, WhatsApp OTP, Mistral OCR for document intake, and Amazon SES email; generates bilingual (Indonesian/English) legal documents with public SHA-256 verification.

Sentiment Analysis with BERT | Personal project

- Fine-tuned BERT to classify customer reviews, reaching 92% accuracy and 0.89 F1 on 4,000+ reviews from Amazon, Walmart, and Flipkart.

Buildio | *Web platform*

- Platform linking customers with repair workers: real-time updates, secure payments, quality control, maintenance alerts, and multi-building repair tracking.

Yemen Apiaries | *Online honey shop*

- E-commerce website for a Yemeni honey producer.

UTA Academy | *English-learning website*

- Built a responsive site with course listings, instructor profiles, registration forms, and event updates for online and offline programs.

PUBLICATIONS

- Sentiment Analysis on Indonesian-Javanese-English Code-Mixed Texts via Parameter-Efficient Fine-Tuning and Selective Layer Unfreezing. IEEE, 2025. ISBN 979-8-3315-0324-6.
- Enhancing Aspect-Based Sentiment Analysis for Consumer Reviews: Cross-Brand Insights from Apple, Samsung, and Xiaomi. EDUSAINTEK (Pendidikan, Sains dan Teknologi), ISSN 1858-005X (print), 2655-3392.

SKILLS

Core AI/ML: NLP, TTS, STT/ASR, multilingual NLP, transformer fine-tuning, RAG, sentiment analysis, language identification

Models & Frameworks: PyTorch, TensorFlow, Hugging Face, scikit-learn, Optuna, LoRA, Whisper-large, Piper, XTTS, ChatterBox, BERT, RoBERTa, DistilBERT

Languages & Web: Python, SQL, TypeScript, JavaScript, HTML, CSS, Next.js, Tailwind CSS

Data & Tools: pgvector, Supabase, MongoDB, Excel, Power BI, Tableau, Looker, Jupyter, Google Colab

Languages: Arabic (native), English (advanced), Indonesian (intermediate)

CERTIFICATIONS

- Supervised Machine Learning: Regression and Classification – Coursera
- Introduction to Parallel Computing – ULL in collaboration with IIUM
